## OBJECTIVES

Highly adaptable and detail-oriented professional with strong computer literacy, organizational, and multi-tasking abilities. Adept at critical thinking, communication, and analysis, with a proven ability to empathize and connect with diverse teams. Seeking a challenging role where I can leverage my skills to contribute to organizational success and growth.

## KEY COMPETENCIES

| | | |
|---|---|---|
| Computer Literacy | Multi-tasking | Empathy |
| Organizational | Communication | Critical Thinking |
| Detail-Oriented | Analyzation | Adaptability |

## PROJECTS

**Data Structure and Algorithm - Program**
**Chabot Development**

Collaborated with groupmates to design and implement a chatbot using Python, demonstrating teamwork and project management skills, presented well to our instructor.

**Advanced Database Management System - Program**
**Coffee Shop Ordering System**

Developed system for coffee shop ordering system that utilizing SQL Databases, the system must have CRUD, collaborated with 2 members and presented well to our instructor.

**Architecture and Organization - Program**
**Information System**

We had a group project where we were tasked to create a simple information system with databases. We were 5 members and I served as the leader. I assigned each of them their respective parts in our project to ensure fairness, and everyone contributed. We presented this through a video presentation.

**Methods Of Research - Program**
**Thesis Title Defense**

The subject MOR (Methods of Research) is, I can say, the most difficult and challenging among all our subjects. Even just thinking of the problem and title requires intense brainstorming and data collection. We are 3 members in our group for creating the thesis title: one for the system, myself for documentation, and another for the interview report. In making our thesis, our patience, critical thinking, cooperation, data gathering skills, good communication skills, interpersonal skills, and defending our research were all tested.

## EDUCATION

**Cavite State University- Bacoor City Campus**
Bachelor of Science in Computer Science
4rth Year Student
Graduated 2023-2024
